Android Win

Project

Mixed System **Android Win !**

project team :

1_ Mohammad Ali Rajab Ali **3_** Mohamed Atef **5_** Mohamed Essam

2_ Mohammad Adel Ali **4_** Mohamed Rashad Fathy **6_** Mohamed Ali Ahmed

the explanation!

Project objective.(purpose)

Android Win is a system based on a combination of the two Android systems for phones and Windows for the computer, *The goal* of the system is

- advance the user's technology.
- save him time and effort..
- Modernization in the idea of the technological system.

The project should be completed within one year and 3month at a cost not to exceed **800.000\$**.

Deliverables.

- Android systems for phones and Windows for the computer and this system provides everything for the user first at the time. the ability to run all Android games on the computer, such as puBG.
- using Android Social networking application on your computer, such as **whatsapp**.
- using windows applications such as visual studio.
- creating **ahigh-speed** program that helps us use computers due to its heavy weight and high price.and sum of the deliverables are requirements, resarsh and developing, design and engineering, and training.

Milestones.

- Define database design starts at 1 Jan ----> 1 Mar.
- Software analysis and software coding starts at 1Mar ,but software analysis ends in 1 Aug, and software coding ends in 1 Jul.

- Interface starts at 1 Aug —> 1 Dec.
- Software testing starts at 1 Jul —> 1 Oct.
- Evaluation and Reports start at 1Dec —> 1 Mar in the next year. Here our project **completed**.

Technical requirements.

- Computers with 18-inch display monitor, dual-core processors, 16GB RAM, wireless card , ethernet card , 1TB drive .
- Professionals programmers with high skills.
- At least seven servers for testing the system.
- Nine full stack developers with at least five years experience.
- Wireless network interface cards and ethernet connections.
- it will require a Strong network and service that can handle both systems and require high-performance Hardware to be able to run both systems together.

Limits and exclusions.

- **On-site work to be done after 8:00 p.m. and before 7:00 a.m. Monday through Saturday.**
- **Android win supports all versions of Windows.**
- **AW supports all high performance smart phones ,but doesn't support low performance of mobile android and IOS .**
- **AW provides secure external access for users.**
- **It can run Android applications as Windows programs.**

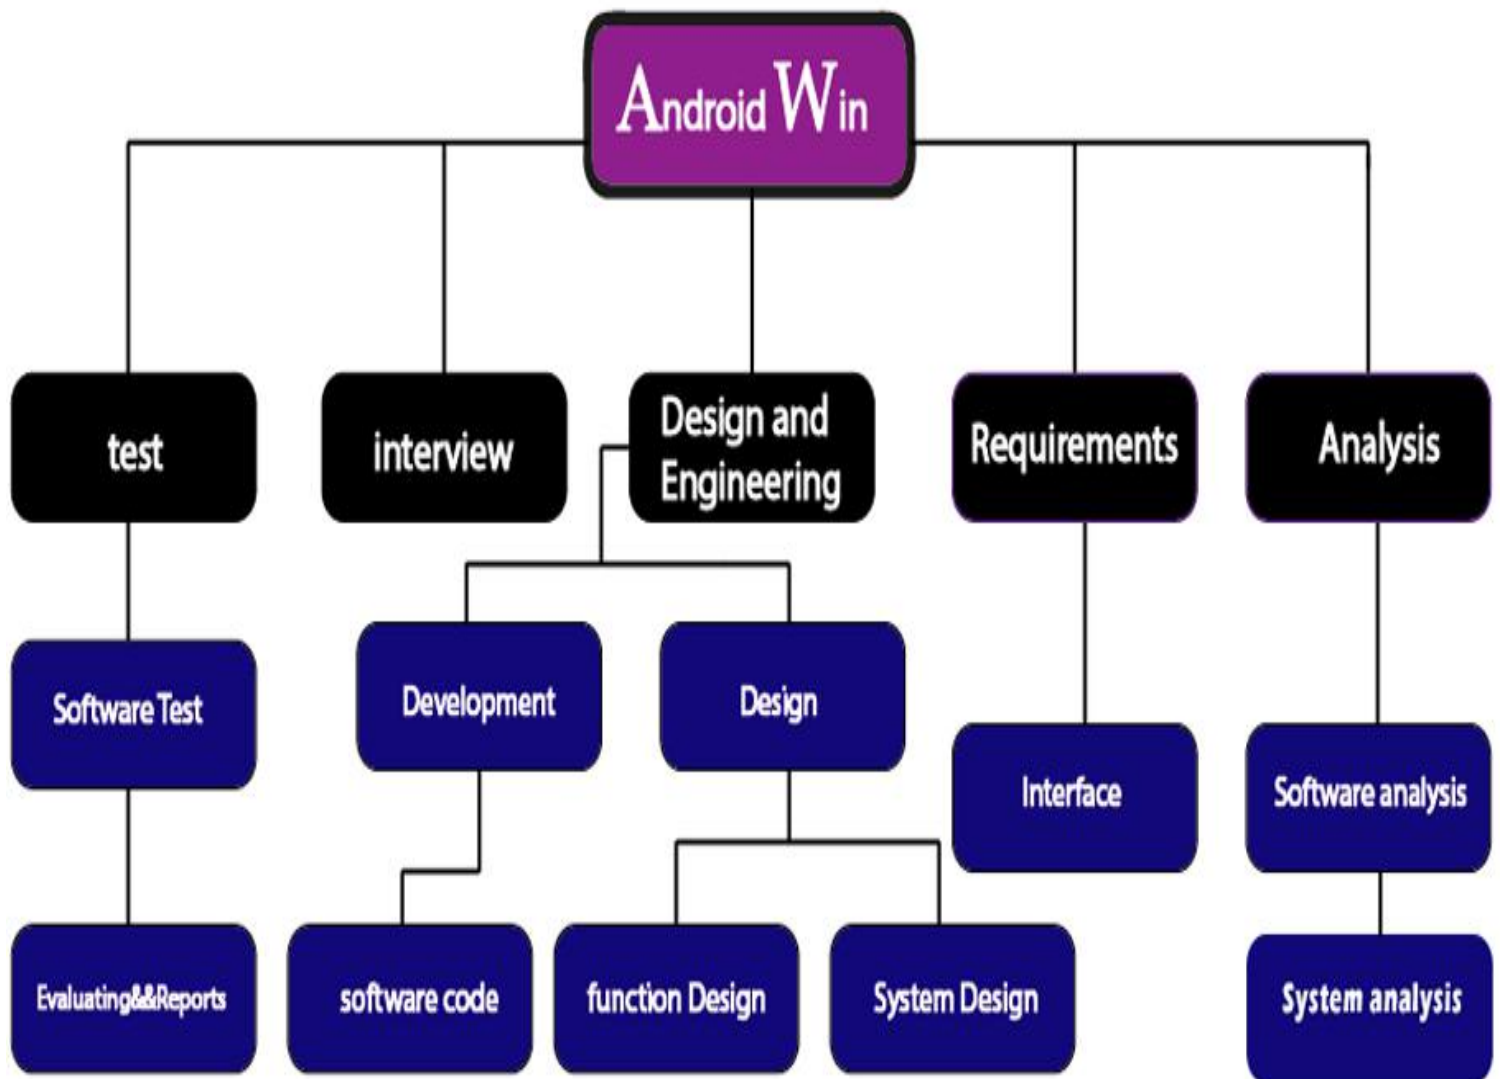

Reviews with customer.

- **Completion** of the scope checklist ends with a review with our customer , internal or external. The team knows that our project definition identify key accomplishments, budgets, timing, and performance requirements.

objective	Deliverables	Milestones	Limits and exclusions
<p>advance the user's technology. save him time and effort.. Modernization in the idea of the technological system.</p>	<p>creating a high-speed program that helps us use computers due to its heavy weight and high price</p>	<p>a significant event in a project that occurs at a point in time. The milestone schedule shows only major segments of work; it represents first, rough-cut estimates of time, cost, and resources for the project. The milestone schedule is built using the deliverables as a platform to identify major segments of work and an end date</p>	<p>can run Android applications as Windows programs. It can connect to normal Android like Windows. We can run this system on computers,</p>
Technical requirements		Team members	Project time
<p>an AW system, it will require a strong network and service that can handle both systems users who have the ability to understand how the system works, it will require high-performance</p>		<p>The number of members of the project team is 6 including the official and the supporter</p>	<p>-The traditional time without a disability is 15 to 20 days The number of working hours for home completion is from 4 to 6 hours 80% achievement</p>

Risk.

1-the cost of the project exceeds its assigned value.

sollution we must implement the specified cost
2-increasing the time for the specified time.
sollution attempt to complete eash task ontime or befor that .

3-people don't like it after its implementation.
sollution to be of high efficiency and to be distinct from other project.

4-Non-acceptance of the customer to the project.
sollution agreement with the project owner on what is required to be implemented in the project.
